

# Digidesign runs to packed houses

Digital audio-production industry leader Digidesign, which has been a regular participant at BroadcastAsia, has been packing curious visitors into its mini-theatre (**booth 7C4-01**) this time with its new digital production techniques.

This year's highlights include a demonstration of the Icon D-Control large-format console, the medium-format console and the Venue live sound entertainment. Also on display are the Pro Tools 7.3 software and the 003 Factory, part of the 003 family, being shown for the first time in Asia.
